Charlotte, NC | +1 (000) 000-0000 | ayalewatna@gmail.com | [Linkedin](#) | [Github](#) | atnafuayalew.com

Professional Summary

Cloud Engineer with 5+ years of experience in technology and hands-on expertise designing, deploying, and supporting AWS cloud solutions. Experienced in building serverless applications and AI-powered solutions using Amazon Bedrock, AWS Lambda, API Gateway, S3, Route 53, Amazon RDS, and VPC. Strong foundation in cloud infrastructure, Linux, networking, and automation, complemented by expertise in data engineering, ETL development, and analytics using Python and SQL. Recognized for delivering secure, scalable cloud-native solutions and translating complex technical challenges into practical business outcomes.

Technical Skills:

Operating Systems: Windows, Linux, Mac

Software: Microsoft (Word, Excel, PowerPoint, Outlook, Calendar) and Google Suite

Cloud Computing: Cloud Concepts and AWS Services, Install and configure the AWS CLI, Using AWS Systems Manager, creating a Website on S3 and Amazon EC2 Instances, Scale and Load Balance the Architecture, Configuring an Amazon VPC

Networking: Basic knowledge of Networking protocols and concepts, creating AWS Virtual Private Cloud, launching EC2 instances, Security Groups, NACL, Subnets, and Internet Gateways

Linux: Fundamental working knowledge of the Linux operating system and Shell Scripting, putting into Linux instances from Windows, editing and working with files, Users, and Groups, Managing File Permissions, working with Commands, and Managing Processes

Programming & Data Engineering: Proficient in Python (Pandas, SQLAlchemy, PySpark) for ETL processes and exploratory data analysis (EDA). Experienced in managing data pipelines, from transformation in Jupyter environments to database loading and management via SQL. Expert in SQL utilizing window functions (ROW_NUMBER, RANK, LAG/LEAD), indexing, joins, and CTEs for complex data retrieval.

Cloud & AI Projects:

AI Cloud Portfolio Website | AWS Serverless Architecture & AI

June 2026

Technologies: React, Amazon S3, CloudFront, Route 53, AWS Lambda, API Gateway, Amazon Bedrock

- Designed and deployed a cloud native portfolio website hosted on Amazon S3 and delivered globally through Amazon CloudFront
- Developed an AI-powered portfolio assistant using Amazon Bedrock, AWS Lambda, and API Gateway to answer recruiters' questions about technical skills, AWS experience, certification, and cloud projects
- Configured Route 53 and AWS Certificate Manager (ACM) to provide secure HTTPS access through a custom domain
- Implemented a fully serverless architecture demonstrating AI integration, REST APIs, prompt engineering, and cloud-native application deployment

CareSync Healthcare Platform | AWS Cloud Architecture

May 2025

Technologies: Amazon VPC, EC2, RDS MySQL, Lambda, API Gateway, Cognito, CloudFormation

- Designed the AWS network architecture using public and private subnets, route tables, an Internet Gateway, and Security Groups
- Designed a relational database schema and deployed an Amazon RDS MySQL within private subnets, following AWS security best practices
- Configured secure connectivity between AWS Lambda and Amazon RDS using Security Groups and database subnet groups
- Collaborated with a cross-functional team to develop and secure a healthcare application using AWS-managed and serverless services
- Automated infrastructure provisioning using AWS CloudFormation to improve deployment consistency and scalability

Professional Experience:

Country Analyst | Freedom House | Addis Ababa, Ethiopia | Remote (consultant) August 2020 - December 2025

- Processed and analyzed large-scale datasets (millions of records) on internet disruptions using the Open Observatory Network Interference (OONI) platform with Excel, SQL, and Python (Pandas)
- Identified and documented 35+ significant global internet disruptions, providing critical insights for annual reporting and policy advocacy
- Automated data extraction workflows by developing API integrations in Python, using SQLAlchemy to streamline database ingestion, and reducing manual processing by 40%
- Designed Tableau dashboards to visualize internet disruption trends and improve stakeholder decision-making by 60%
- Authored four annual internet freedom reports, translating complex data into actionable data-driven insights for global stakeholders

Education

Per Scholas | AWS re/Start Training | Charlotte, NC July 2026

- This rigorous, full-time, 15-week virtual re/Start Training program provides an understanding of Cloud Computing Services, Networking, Databases, and AWS Cloud Management, Monitoring, and Governance Services.
- Attended weekly professional development sessions to build a personal brand, create a strong technical resume, practice professional communication and collaboration skills, and develop the skills required to succeed in a technical environment.
- Course Focus: Linux, Python, Auto Scaling, EC2, Lambda, Shell Scripting, Cloud Concepts, Network Firewall, AWS System Manager, Redshift, and DynamoDB.

UNCC | Data Analytics and Visualization | Charlotte, NC April 2025

- Completed a rigorous six-month Data Analytics & Visualization program, developing skills in Python (Pandas, Matplotlib), SQL, Tableau, JavaScript ([D3.js](#)), and Machine Learning, with a focus on deriving insights and storytelling through complex data visualization.

St. Mary's University | Bachelor of Science in Computer Science | Addis Ababa, Ethiopia March 2022

- Completed core coursework in software engineering, database management, and data structures.

Certifications:

- AWS re/Start Graduate | Amazon Web Services & Per Scholas | July 2026
- AWS Certified Cloud Practitioner (CLF-C02) | July 2026
- Data Analytics & Visualization Certification | UNC Charlotte | April 2025
- Operating System Basics | Cisco Networking Academy
- Computer Hardware Basics | Cisco Networking Academy
